

# FLP-B+C MAXI VS/1+1

pluggable module, visual fault signalling, module locking, remote fault signalling

- combination of high performance lightning current arrester and encapsulated efficiency spark gap, connected in the 1+1 mode
- installation at the boundary of zones LPZ 0 and LPZ 1 or higher, mainly to main distribution boards
- for protection against impact of direct or indirect lightning strikes in wide range of applications with single-phase power supply, resp. to sub-distribution boards in large buildings
